PROFESSIONAL SUMMARY

OSCP-certified offensive security engineer with experience assessing enterprise, application, and cloud environments for Fortune 100 organizations. Leads purple team engagements and social engineering campaigns, builds offensive tooling in Python and C#, and partners with SOC teams to strengthen detection coverage.

CERTIFICATIONS

- Offensive Security Certified Professional (**OSCP**)
- Microsoft Certified: Azure Security Engineer Associate (**AZ-500**)
- Microsoft Certified: Azure Administrator Associate (**AZ-104**)

WORK EXPERIENCE

Red Team Security Engineer May 2026 - Present
Toyota Motor North America *(on contract from TTS)*

- Lead purple team engagements end to end across **Active Directory, Entra ID, and cloud environments**, emulating **MITRE ATT&CK** techniques and collaborating with the SOC to identify and address **SIEM/EDR** detection gaps.
- Lead social engineering campaigns to assess organizational resilience and identify opportunities to improve security controls.
- Develop custom offensive tooling and payloads in **Python and C#** to support adversary emulation across enterprise and cloud environments.

Software Engineering Intern June - August 2025
Confluent

- Developed a **Terraform provider in Go** for an internal resource management API, enabling CRUD operations for custom resource types.
- Implemented resource schemas, mapped API responses into **Terraform state**, and added API error handling; integrated the provider into **Semaphore CI/CD** workflows.

Senior Security Engineer June 2021 - May 2024
Praetorian

- Led penetration tests for Fortune 100 clients across **web applications, APIs, cloud**, and enterprise environments, identifying vulnerabilities and providing actionable remediation guidance.
- Performed application security testing using **Burp Suite, Postman, OWASP ZAP, Nuclei**, and custom tooling, targeting authentication, authorization, business logic, and API vulnerabilities.
- Assessed enterprise network and Active Directory security using **BloodHound, Impacket, Rubeus, Certipy**, and **netexec**, identifying privilege escalation paths, ACL abuse, Kerberos delegation, and ADCS misconfigurations.
- Built **Python** automation for security scanning and vulnerability discovery to support penetration testing engagements.

EDUCATION

University of Pennsylvania (Philadelphia, PA)
Bachelor's of Science in Engineering, Computer Engineering
University of Texas at San Antonio (San Antonio, TX)
Master's of Science in Cybersecurity Science

ACHIEVEMENTS

- **1st place, Southwest Collegiate Cyber Defense Competition 2026** and **3rd place, SWCCDC 2025** as Team Captain.
- Awarded the **Rachleff Scholarship** at the University of Pennsylvania for undergraduate research.
- Published technical research at Praetorian on **authentication coercion (DFSCoerce)**, **incident response playbooks**, and **security evidence management**.
